EXPERIENCE

Full Stack Developer

Desco Industries Inc.

July 2024 - Current

Currently working as a full-stack developer supporting 15 eCommerce brands, working across front-end development, back-end integrations, SQL data pipelines, and production environment support..

Major Contributions

- Implemented Elasticsearch indexing and search pipelines for 15 e-commerce brands, improving product discovery and reducing search latency.
- Developed secure end-to-end credit card processing flows using CyberSource and Red Maple, including tokenization, AVS/CVV validation, and 3DS authentication.
- Migrated and modernized legacy ERP integrations from NAV to Business Central, including SQL view redesign, stored procedure optimization, and ETL tuning.
- Built and maintained internal Angular + .NET Core full-stack applications, integrating Firebase authentication and real-time data workflows.
- Managed IIS/Windows Server infrastructure, from handling deployment pipelines, SSL management, scheduled tasks, and environment troubleshooting, to redesigning enterprise server cabinets and upgrading hardware.
- Refactored and optimized SQL Server tables, views, and indexes for multi-million-row datasets to improve performance and reliability.

EDUCATION

University of Massachusetts Boston

BS in Computer Science – Boston, MA

Sep 2020 – Dec 2022

Southern New Hampshire University

BS in Computer Science – Manchester, NH

Feb 2023 – September 2025
